

IMPORTANT

INFORMATION REGARDING PRODUCT LABELING

Last year, we introduced a more descriptive nomenclature for our products. This new product labeling not only improves identification but also reflects the specific requirements and specifications of our products more accurately.

What is changing?

The new product codes expand upon the previous names and offer a clearer structure as well as additional information about each product. The old names remain informative and are encoded within the new nomenclature.

If needed, we are happy to provide certificates confirming the equivalence between the old and new product designations.

Example of a change:

- **Previous:** Pressure Transmitter SPT-I2 (SPT - Standard Pressure Transmitter; I2 - 2-wire current output)
- **New:** PMP-S122-I2 (PM - Prignitz Mikrosystemtechnik, P - Pressure, S - SPT Product Series, 122 - Version, Technology, and Material; I2 - 2-wire current output)

New Nomenclature for Product Categories:

- **Pressure Transmitters (P - Pressure):**
 - PMP-S... = SPT Series (Standard Pressure Transmitter)
 - PMP-C... = CIT Series (Computerized Intelligent Transmitter)
 - PMP-D... = DPT Series (Differential Pressure Transmitter)
 - PMP-SW... = Pressure Switches
- **Level Transmitters (L - Level):**
 - PML-S... = PS Series (Standard Level Probe)
 - PML-C... = CPS Series (Computerized Level Probe)
- **Temperature Transmitters (T - Temperature):**
 - PMT-S... = STT Series (Standard Temperature Transmitter)
 - PMT-C... = CTS Series (Compact Temperature Sensor)

For more information on this change and the specific product details, please refer to the respective datasheets on our website. If you have any questions or need support, our customer service team is always available to assist you. Please contact us at:
