

P2P Technology PMP-S222-H

DATASHEET

- SPT Family: Standard Pressure Transmitters APPROVED FOR HYDROGEN
- COMPACT DESIGN, HIGH INTEGRATION DENSITY
- HIGH MEDIA RESISTANCE, NO INTERNAL SEALS, WITHOUT WELD SEAM
- DIAGNOSTIC FUNCTION BASED ON THE OUTPUT SIGNAL (OPTIONAL)
- CUSTOMIZING POSSIBLE

MAIN FEATURE

- **Pressure ranges**: -1 ... 10 bar to -1 ... 1000 bar (-14.5 psi ...145 psi to -14.5 14500 psi)
- Mechanical connections: G1/4"A Form E, DIN EN ISO1179-2; 1/4"-18 NPT; 7/16-20 UNF SAE J514
- Electrical connections: M12x1 (S763-4) (plastic), Packard Metri-Pack, DEUTSCH DT 04-3P, DEUTSCH DT 04-4P, AMP Superseal
- Wetted parts: stainless steel 1.4404 (316L)
- **Response time:** ≤ 2ms
- Accuracy (25°C): ≤ 0.5 % FS
- Certificate: EC 79/2009 Hydrogen type approval up to 600 bar

DESCRIPTION

The piezoresistive, very compact pressure transmitters from SPT-Family (without oil reservoir) is **based on a new type of two-chip technology (P2P Technology - our patented development)**, which enables the highest demands on robustness and performance such as stability, vibration, and shock resistance.

It was specially designed for OEM series use in harsh environmental conditions, such as those that prevail in the off-road sector (Vehicles and Machines in Construction, Mining, Farming, Military etc). Compared to conventional machine building, the field of mobile equipment has more demanding requirements, particularly with regard to resistance to overpressure, vibration and shock, as well as increased EMC performance. The pressure sensors PMP-S222-H were specially optimized for this and are therefore a robust solution for one of the sensor types most frequently used in mobile equipment.

All manufacturing steps from packaging in modern clean rooms to final calibration take place in Prignitz Mikrosystemtechnik in Germany.

APPLICATIONS

INDUSTRIAL AUTOMATION Test stands, CNC equipment, Presses, HVAC

RENEWABLE ENERGY Oil, Gas, Wind, Water, Hydrogen, Power stations

INDUSTRIAL PROCESS CONTROLE Chemical, Pharma, Food

OFF HIGHWAY MOBILE EQUIPMENT Vehicles and Machines in Construction, Mining, Farming, Military

TRANSPORTATION Trucks, Busses, rail, Road Construction Machines

MARINE & OFFSHORE Engines, Hydraulic, Fluidhandling

PRODUCT CONSTRUCTION

4

Befor installation and operation, ensure that the appropriate pressure sensor has been selected in terms of pressure range, design and specific measuring conditions. Non compliance can result in serious injure and/or damage to the equipment.

WARNING: Prignitz Mikrosystemtechnik reserve the right to modify their products without notice. It is imperative that we should be consulted over any particular use or application of our products and it is the responsibility of the buyer to establish, particularly through all the appropriate testes, that the product is suitable for the use or application. Under no circumstances will our warranty apply, nor shall we be held responsible for any application (such as any modification, addition, deletion, use in conjunction with other electrical or electronic components, circuits or assemblies, or any other unsuitable material or substance) which has not been expressly agreed by us prior to the sale of our products.

APPROVALS CERTIFICATE

CE Compliance: EMC directive 2014 / 30 / EU according in EN 61326-2-3 RoHS guideline: 2011/65/EU Approved according to the European Directive EC79/2009

PRIGNITZ-Mikrosystemtechnik GmbH is certified acc. to ISO 9001. We offer a multitude of products compliant with ATEX, IECEx, CSA, and other worldwide relevant qualifications.

CUSTOMIZED SOLUTIONS

An indisputable advantage of the products from Prignitz Mikrosystemtechnik is that in addition to the specified parameters, a variety of specific customer requests can be implemented:

- EX versions are available for use in hazardous areas (ATEX, IECEx, CSA)
- other process and electrical connections available in a wide range of options
- analog output signals can be customized upon request.

Feel free to ask us. We are ready to implement individual solutions for you.

TRANSPORT, PACKAGING AND STORAGE

Transport

Check the pressure transmitter for any damage that may have been caused during transportation. Obvious damage must be reported immediately.

Packaging and storage

Do not remove packaging until just before mounting.

Keep the packaging as it will provide optimum protection during transport (e.g. change in installation site, sending for repair).

Permissible conditions at the place of storage:

• Storage temperature: -40 ... +125 °C

DISMOUNTING, RETURN AND DISPOSAL

Dismounting

Physical injuries and damage to property and the environment caused by hazardous media. Upon contact with hazardous media (e.g. oxygen, acetylene, flammable or toxic substances), harmful media (e.g. corrosive, toxic, carcinogenic, radioactive), and also with refrigeration plants and compressors, there is a danger of physical injuries and damage to property and the environment.

- Should a failure occur, aggressive media with extremely high temperature and under high pressure or vacuum may be present at the instrument.
- Wear the requisite protective equipment.

Dismounting the instrument

- Depressurise and de-energise the pressure transmitter.
- Disconnect the electrical connection.
- Unscrew the pressure transmitter with a spanner using the spanner flats.

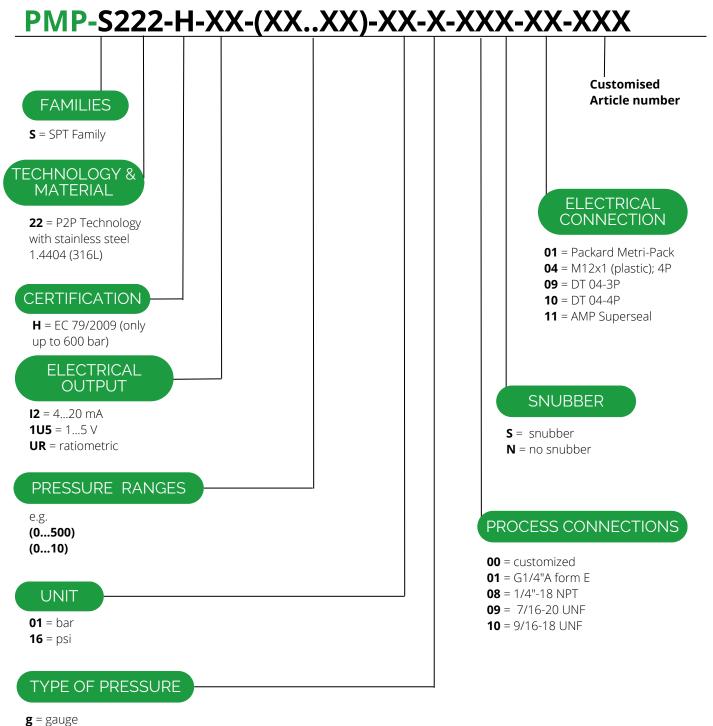

Return

Strictly observe the following when shipping the instrument:

All instruments delivered to Prignitz Mikrosystemtechnik must be free from any kind of hazardous substances (acids, bases, solutions, etc.) and must therefore be cleaned before being returned.

Edition version: D/S222-H/Rev.4/April.2025/ENG
